Total Gross of Fee Return	0.80%	2.9%	3.6%
Loan Investments at Fair Value	\$37,181		
Number of Loans	652		
Number of Active Funds	16		

The NCREIF/CREFC Open-end Debt Fund Aggregate is a fund-level aggregate comprising open-end funds that provide credit and financing to borrowers who own commercial real estate. This report will be issued in a draft “consultation” format for at least one year to obtain industry feedback before it is rolled out as an official product.

The NCREIF/CREFC Open-end Debt Fund Aggregate...

- Will enhance investors’ interest & understanding of the rewards and risk of private real estate debt funds, which may lead to increased allocations to debt, benefiting managers, investors, and commercial real estate finance industry professionals.
- **Contains funds with various strategies and styles ranging from core to value-add, as reported by the managers. The performance metric is a time-weighted return. The returns are equal-weighted across the funds** since the aggregate contains a few large funds that would dominate the results if it were value-weighted.
- **Is NOT a BENCHMARK**, yet, but is a major step toward the goal of creating a more focused index/benchmark of funds that meet certain investment inclusion criteria, which are to be determined.
- Is anticipated to be published quarterly. Results will never reveal individual fund performance.
- Is a project by the industry for the industry that has been in the works for a few years with input from the data contributing managers, investors, consultants and CREFC, the Commercial Real Estate Finance Council, an industry organization that is working closely with NCREIF to help promote the product.
- Furthers NCREIF’s and CREFC’s mission; *“NCREIF is a member-driven, not-for-profit association that improves private real estate investment industry knowledge by providing transparent and consistent data, performance measurement, analytics, standards and education.” “CREFC is the trade association for the commercial real estate finance industry. CREFC promotes liquidity, transparency, and efficiency in the commercial real estate finance markets. It does this by acting as a legislative and regulatory advocate for the industry, playing a vital role in setting market standards and best practices, and providing education for market participants. Member firms include balance sheet and securitized lenders, loan and bond investors, private equity firms, servicers, and rating agencies, among others.”*

Fund Inclusion

1. Investment Managers must:
 - a. offer an open-end fund product to institutional investors that does debt lending for predominantly private U.S. commercial real estate. Specifically, 80% of total assets must be invested in private debt real estate.
 - b. calculate quarterly net asset values and returns on a market value basis.
 - c. agree to submit all requested data and do so within the time frame required.
 - d. be a NCREIF data contributing member once this becomes an official product.
2. Funds included have different:
 - a. **structures, strategies, liquidity provisions, dividend, accounting, and valuation policies, all of which affect performance and comparability. As a result, this product is not a benchmark.**
